

Claims

1. A sleeve for accommodating a scorecard (1), for which the scorecard (1) is disposed between a closed outer wall (2) and an inner wall (3), can be inspected from the outside and can be folded (4) easily, by means of which, after the folding, the thereby divided inner wall halves lie on top of one another and whereby, after the folding, the printed field of the scorecard (1) is visible once again, characterized in that the inner wall (3) has a recess (6) exposing the printed part of the scorecard (1) and that, opposite the inside of the outer wall (2) at least an edge of the recess (6) remains for holding the scorecard (1).

2. The sleeve of claim 1, characterized in that means are present for holding together the parts folded on top of one another.

3. The sleeve of claim 2, characterized in that a Velcro seal, disposed in the edge region, forms the means.

4. The sleeve of claim 2, characterized in that a connecting tab is used as means.

5. The sleeve of one of the preceding claims, characterized in that, for informational purposes and especially for advertising purposes, there is printing on the

outer wall (2).

6. The sleeve of one of the preceding claims, characterized in that leather is used as sleeve material.

7. The sleeve of one of the preceding claims, characterized in that, at the front face, between the outer wall (2) and the inner wall (3), a slot (5) is provided for inserting the scorecard (1) between the walls.
